THE PARTIZAN TROPHY

This solid bronze statuette of a Yugo-Slav Partizan was presented to the British Amateur Athletic Board by the Partizan Club of Belgrade, during a British tour of the Balkans in 1951. It was presented by the BAAB to the Hammer Circle in June1953, to be awarded annually to the most improved senior hammer thrower in Great Britain. Despite its size of 27"/68cms tall weighing 3 stone/19 kilos the trophy went missing and its whereabouts was unknown for decades. In 2009 the 'Sedykh Programme' was introduced to the collection to recognise the most improved 7.26kg performance over 60m.

In 2018 the trophy was rediscovered and returned to the Hammer Circle where it was prominently displayed at the 66th Reunion in Hull. Whilst looking for a special award to recognise our first 80m throwers in 2018 the trophy was replicated by laser crystals into glass blocks to formally acknowledge the historic 80m milestone of Nick Miller 7.26kg and Jake Norris 6kg.

The Partizan replicas are now the Hammer Circle 80m awards and the original will be, where possible, passed to recipients who never had the opportunity to take it home. We continue to fill in the missing names from old Hammer Circle bulletins but in 2018 Paul Dickenson was presented with the original Partizan Trophy for the first time – forty four years after he won it.
